6. Public Library Access

The Public Library Access Initiative (PLI) was a key recommendation of the UK 'Finch' report of July 2012 (Accessibility, sustainability, excellence: how to expand access to research publications). It provides patrons of public libraries with walk-in access to research articles and conference proceedings. We have enrolled all Taylor & Francis and Routledge titles, subject to journal owners' permission, in a two year pilot, involving libraries throughout the UK. 80% of UK library services have signed up to the PLI, allowing users free access to over 10 million articles. We believe that the PLI is a viable means to democratize access to content, and allows publishers, editors and societies to show our commitment to open access principles, without jeopardizing the subscription base on which many journals depend.

7. Open Access

OA is a fast moving area, so we've included links to key resources and some headlines from our programme below.

Revised Green OA policy

Authors can now post their Accepted Manuscript (AM) article versions to personal or departmental websites, Facebook, and LinkedIn upon publication of the final article. Embargoes remain in place for posting the AM to repositories or academic social networks such as Mendeley, Academia.edu or ResearchGate. Find out more: http://bit.ly/1riiBTF. We have a pilot scheme on our Library and Information Science and Archives and Heritage titles where no embargoes are in place for posting of the AM, and plan to report any meaningful findings from this pilot (http://bit.ly/1opowZF).

OA membership options for institutions

We have an ever-increasing number of institutions signing up to an OA membership scheme with Taylor & Francis, offering discounts on article publishing charges. Why not encourage authors from a member institution to try Gold OA? Find out more here:

http://www.tandfonline.com/page/openaccess/funders

Offset models

We have an agreement with JISC Collections for 2015, which offers participating UK institutions a number of

vouchers which they can use to obtain a 75% discount on article publishing charges in most (hybrid open access) Open Select journals. We have also agreed a pilot offset scheme in Austria, whereby members of the KEMO academic library consortium receive a credit based on the previous full year's APC spend by the Austrian Science Fund (FWF). We will continue the global offset policy of reducing journal subscription pricing if the proportion of OA articles exceeds a certain threshold:
